

Analyzing and Visualizing

WeRateDogs Twitter Account Insights

So, I did some analysis and visualizations on the data and I have got those insights

What is the most tweeting month for WeRateDogs Account?

- December

What is the highest rate for any dog? What are the breeds that have been rated with this rate?

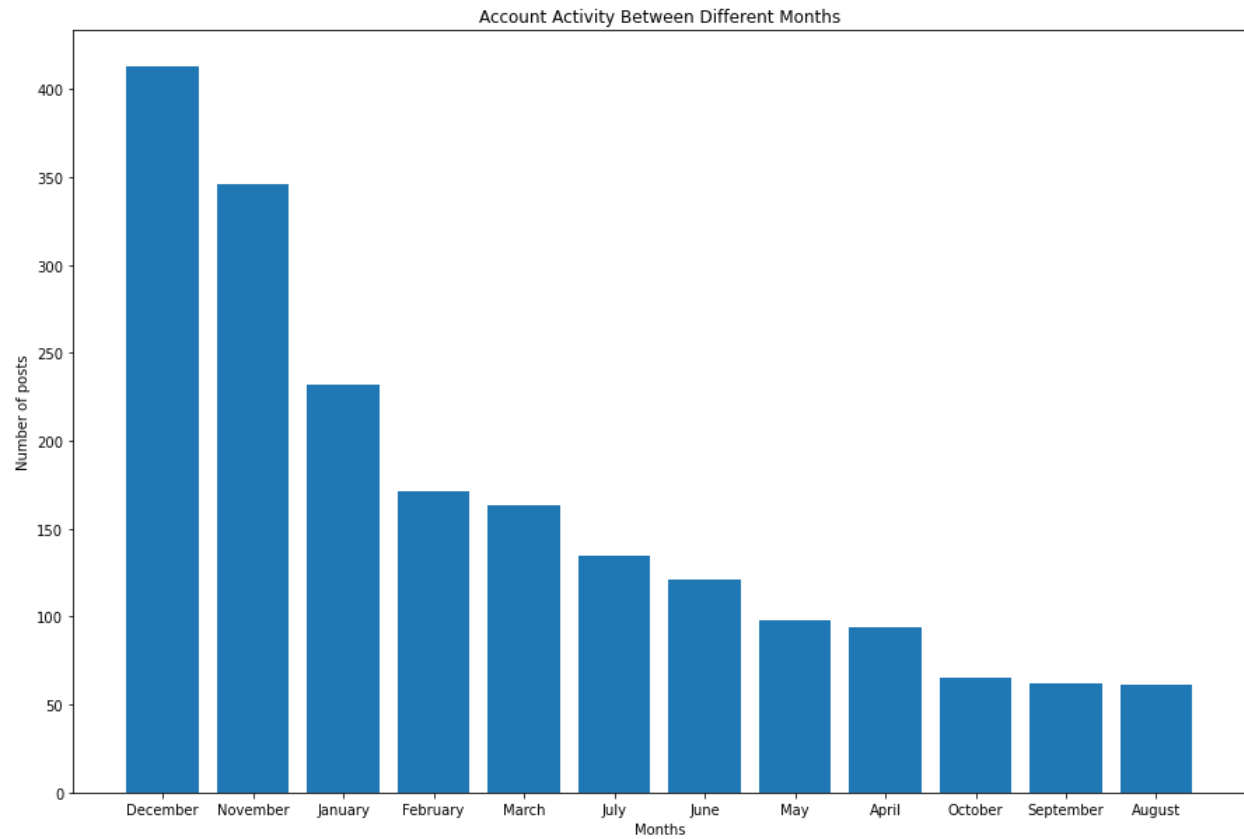

- Highest Rate: 1.4
- The Names of Breeds: 'Pembroke', 'Samoyed', 'French_Bulldog', 'Chihuahua', 'Black-And-Tan_Coonhound', 'Bloodhound', 'Golden_Retriever', 'Bedlington_Terrier', 'Rottweiler', 'Pomeranian', 'Irish_Setter', 'Gordon_Setter', 'Standard_Poodle', 'Eskimo_Dog'

What is the highest favorite count and re-tweet count? What are the ratings, breeds of the dogs with these values? Whether it is the same dog or two different dogs.

- The Highest Re_tweet Count: 74674
- The Highest Favourite Count: 150971
- The Dog Breed of The Most Re-Tweeted Post: Labrador_Retriever, it's Rating: 1.3
- The Dog Breed of The Highest Favourite Count Post: Labrador_Retriever , it's Rating: 1.3

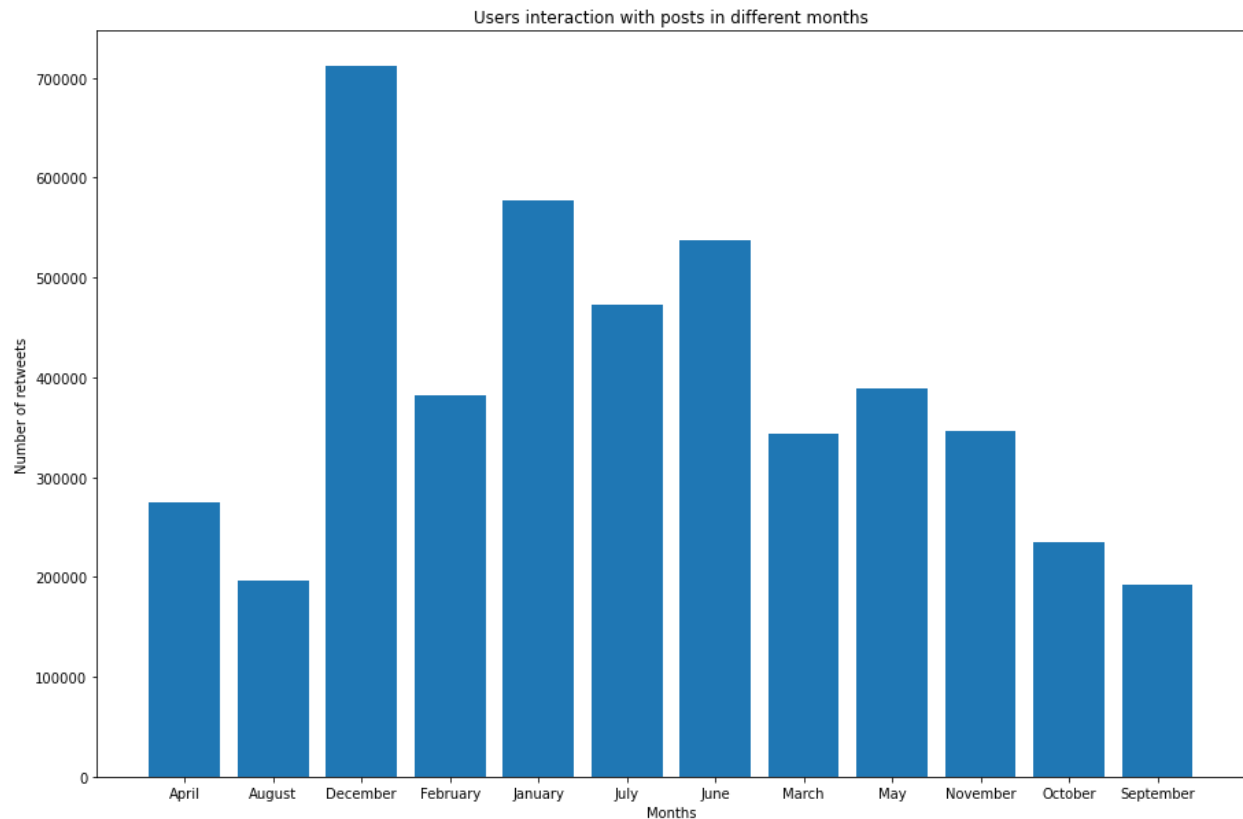

The Account activity between Different Months:

- Here, I am showing the number of monthly posts through all the months
- The highest active period for the account was in December, while the lowest was in August.

Users interaction with posts in different months:

- Here I am showing the number of monthly re-tweets through all months .
- The most high interaction happens in December, while the least is at August.

Important Note:

From those 2 visualizations. We note that the highest rate of user interaction with posts was in December, and the highest period in which the account was active was in December. This is what makes us discover that the more the account activities on Twitter, the more users interact with the posts.
